FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)

YEAR ENDED JANUARY 31, 2010

MEYERS NORRIS PENNY LLP

AUDITORS' REPORT

To the Shareholders of **Pacific Booker Minerals Inc.:**

We have audited the balance sheets of Pacific Booker Minerals Inc. (the Company) as at January 31, 2010 and 2009 and the statements of operations and cash flows for the years ended January 31, 2010, 2009 and 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at January 31, 2010 and 2009 and the results of its operations and its cash flows for the years ended January 31, 2010, 2009 and 2008 in accordance with Canadian generally accepted accounting principles.

Comments by Independent Registered Chartered Accountants for U.S Readers on Canada-United States of America Reporting Differences

In the United States, the reporting standards, of the Public Company Accounting Oversight Board, for auditors require the addition of an explanatory paragraph when the financial statements are affected by conditions and events that cast substantial doubt on the company's ability to continue as a going concern, such as those described in Note 1 to the financial statements. Our report to the shareholder dated April 22, 2010, is expressed in accordance with Canadian reporting standards which do not permit a reference to such events and conditions in auditor's report when these are adequately disclosed in the financial statements.

Supplemental disclosure with respect to cash flows (Note 10)

1. NATURE AND CONTINUANCE OF OPERATIONS

The Company was incorporated under the Company Act of British Columbia and its principal business activity is the exploration of its mineral property interests, with its principal mineral property interests located in Canada.

The ability of the Company to realize the costs it has incurred to date on its mineral property interests is dependent upon the Company being able to finance its exploration costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the mineral property interest. To date, the Company has not earned any revenue and is considered to be in the advanced exploration stage.

These financial statements have been prepared on a going concern basis, which assumes the Company will be able to realize assets and discharge liabilities in the normal course of business for the foreseeable future. These financial statements do not include the adjustments that would be necessary should the Company be unable to continue as a going concern. The Company has incurred losses since inception and the ability of the Company to continue as a going-concern depends upon its ability to develop profitable operations and to continue to raise adequate financing.

There can be no assurance that the Company will be able to continue to raise funds in which case the Company may be unable to meet its obligations. Should the Company be unable to realize on its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded on the balance sheets.

	2010	2009
Working capital	\$ 2,830,540	\$ 6,143,748
Deficit	(21,809,575)	(19,555,490)

2. SIGNIFICANT ACCOUNTING POLICIES

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"). The significant accounting policies adopted by the Company are as follows:

(a) Use of estimates

The preparation of financial statements in accordance with Canadian GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the year. Actual results could differ from these estimates. The most significant estimates made by management relate to amounts recorded for the depreciation of capital assets, measurement of stock-based compensation, future income tax assets and liabilities, the recoverability of mineral properties, and the provision for the asset retirement obligation.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

(a) Use of estimates (cont'd...)

The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected.

(b) Foreign currency translation

The monetary assets and liabilities of the Company that are denominated in foreign currencies are translated at the rate of exchange at the balance sheet date and non-monetary items are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in the statement of operations.

(c) Cash and cash equivalents

Cash includes cash on hand and demand deposits. Cash equivalents includes short-term, highly liquid investments that are readily convertible to known amounts of cash and have a maturity date of less than 90 days and are subject to an insignificant risk of change in value.

(d) Allowance for receivables

The Company establishes an allowance for receivables on a specific account basis. No allowance for receivables was recorded by the Company as at January 31, 2010 and 2009.

(e) Mineral property interests and deferred exploration costs

All costs related to the acquisition, exploration and development of mineral properties are capitalized by property. If economically recoverable ore reserves are developed, capitalized costs of the related property are reclassified as mining assets and amortized using the unit of production method. When a property is abandoned, all related costs are written off to operations. If, after management review, it is determined that the carrying amount of a mineral property is impaired, that property is written down to its estimated net realizable value. A mineral property is reviewed for impairment whenever events or changes in circumstances indicate that its carrying amount may not be recoverable.

The recorded cost of mineral property interests and deferred exploration costs is based on cash paid and the value of share consideration issued for mineral property interest acquisitions and exploration costs incurred. The recorded amount may not reflect recoverable value as this will be dependent on future development programs, the nature of the mineral deposit, commodity prices, adequate funding and the ability of the Company to bring its projects into production.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

(f) Asset retirement obligation

The Company recognizes the fair value of a liability for an asset retirement obligation in the year in which it is incurred when a reasonable estimate of fair value can be made. The carrying amount of the related long-lived asset is increased by the same amount as the liability.

Changes in the liability for an asset retirement obligation due to the passage of time will be measured by applying an interest method of allocation. The amount will be recognized as an increase in the liability and an accretion expense in the statement of operations. Changes resulting from revisions to the timing or the amount of the original estimate of undiscounted cash flows are recognized as an increase or a decrease to the carrying amount of the liability and the related long-lived asset.

The Company does not have any significant asset retirement obligations.

(g) Equipment, vehicles and furniture

Property and equipment are recorded at cost. The Company provides for amortization annually as follows:

Automobile	30% declining balance
Computer equipment	30% to 45% declining balance
Office furniture and equipment	20% declining balance
Trailers	30% declining balance

(h) Stock-based compensation

The fair value of stock options granted is determined using the Black-Scholes option pricing model and recorded as stock-based compensation expense over the vesting period of the stock options.

(i) Loss per share

The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method, the dilutive effect on earnings per share is recognized on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the year. The weighted average number of common shares outstanding for the year ended January 31, 2010 do not include the nil (2009 – nil; 2008 – 1,286,500) warrants outstanding and the 2,000,357 (2009 – 2,065,357; 2008 – 1,564,077) stock options outstanding as the inclusion of these amounts would be anti-dilutive.

Basic loss per share is calculated using the weighted-average number of common shares outstanding during the year.

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

(j) Future income taxes

Future income taxes are recorded using the asset and liability method. Under the asset and liability method, future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Future tax assets and liabilities are measured using the enacted or substantively enacted tax rates expected to apply when the asset is realized or the liability settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in income in the period that substantive enactment or enactment occurs. To the extent that the Company does not consider it more likely than not that a future tax asset will be recovered, it provides a valuation allowance against the excess.

(k) Comprehensive income - Section 1530

This section establishes standards for reporting and presentation of comprehensive income, which is comprised of net earnings or loss and other comprehensive income. Other comprehensive income represents the change in net equity for the period that arises from unrealized gains and losses on available-for-sale financial instruments, and changes in the fair market value of derivative instruments designated as cash flow hedges. Amounts included in other comprehensive income are shown net of tax. Cumulative changes in other comprehensive income are included in accumulated other comprehensive income which is presented (if applicable) as a new category in shareholders' equity. The Company did not have any transactions during the year ended January 31, 2010 that give rise to other comprehensive income, and therefore has no balance of other accumulated other comprehensive income.

3. FINANCIAL INSTRUMENTS

Financial instruments - Recognition and Measurement - Section 3855

This section establishes standards for the recognition, measurement disclosure and presentation of financial instruments. Under the new standard, financial assets and liabilities are initially recognized at fair value and are subsequently measured based on their classification as held-for-trading, held-to-maturity, loans and receivables, available-for-sale, or other financial liabilities, as described below:

(a) Held-for-trading

Financial assets and financial liabilities that are purchased and incurred with the intention of generating profits in the near term are classified as held-for-trading. Any financial instrument can be designated as held for trading as long as its fair value can be reliably measured. These instruments are measured at fair value with subsequent changes in fair value included in earnings.

The company has classified cash and cash equivalents as held-for-trading, which accordingly are carried at their fair values. Held-for-trading assets are not subject to significant credit, foreign exchange or interest rate risk.

(b) Held-to-maturity

Financial assets that have a fixed maturity date and fixed or determinable payments, where the company intends and has the ability to hold the financial asset to maturity are classified as held-to-maturity and measured at amortized cost using the effective interest rate method. Any gains and losses arising from the sale of held-to-maturity financial assets are included in earnings. Currently, the company has no held-to-maturity financial assets.

3. FINANCIAL INSTRUMENTS (cont'd...)

(c) Loans and receivables

Items classified as loans and receivables are measured at amortized cost using the effective interest method. Any gains or losses on the realization of loans and receivables are included in earnings.

The company has classified receivables and deposits, which are accordingly measured at amortized cost. Due to their short-term natures, the fair values of receivables approximate their carrying values, and they are not subject to significant credit or interest rate risk.

(d) Available-for-sale

Available-for-sale assets are those financial assets that are not classified as held-for-trading, held-to-maturity or loans or receivables, and are carried at fair value. Any gains or losses arising from the change in fair value are recorded as other comprehensive income. Available-for-sale securities are written down to fair value through earnings whenever it is necessary to reflect other-than-temporary impairment. Cumulative gains and losses arising upon the sale of the instrument are included in earnings.

The company has classified reclamation deposits as available-for-sale, which are accordingly carried at their fair values. Available-for-sale assets are not subject to significant credit, foreign exchange or interest rate risk

(e) Other financial liabilities

Financial liabilities that are not classified as held-to-maturity are classified as other financial liabilities, and are carried at amortized cost using the effective interest method. Any gains or losses arising from the realization of other financial liabilities are included in earnings.

The company has classified accounts payable and accrued liabilities as other financial instruments, which are accordingly carried at amortized cost. Due to their short-term natures, the fair values of other financial liabilities approximate their carrying values, and they are not subject to significant credit, foreign exchange or interest rate risk.

4. CHANGES IN ACCOUNTING POLICIES

During the year ended January 31, 2010, the Company adopted the following new or revised Canadian accounting standards. Prior periods have not been restated. The adoption of these policies had no impact on the opening deficit.

(a) Capital disclosures

Section 1535 "Capital Disclosures" specifies the disclosure of (i) an entity's objectives, policies and processes for managing capital, (ii) quantitative data about what the entity regards as capital, (iii) whether the entity has complied with any capital requirements, and (iv) if it has not complied, the consequences of such non-compliance.

(b) Financial instruments

Sections 3862 Financial Instruments - Disclosure and Section 3863 Financial Instruments - Presentation". These new sections revise and enhance disclosure requirements and carrying forward unchanged presentation requirements. Increased emphasis is placed on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks.

4. CHANGE IN ACCOUNTING POLICIES (cont'd...)

(c) Financial instruments - reclassification of financial assets

In October 2008, the AcSB issued amendments to its standards dealing with reclassification of financial assets in response to similar amendments made by the International Accounting Standards Board in the context of the current financial market turmoil. The amendments allow reclassification of financial assets out of the held-for-trading category (measured at fair value with gains and losses recognized immediately in net income) into the available-for-sale or held-to-maturity categories, in "rare circumstances." The latter two categories are subject to impairment testing, but income statement charges for impairment are recognized when impairment is considered "other than temporary." The financial assets that can be reclassified exclude derivatives and financial assets an entity has elected to include in the held-for-trading category. Assets qualifying for reclassification are mainly debt and equity investments that were originally classified as held for trading because they were acquired for the purpose of near-term sale. The amendments apply to reclassifications made on or after July 1, 2008. The Company did not reclassify any financial assets in 2010.

(d) Going Concern

In June 2007, the CICA approved amendments to Handbook Section 1400 "General Standards for Financial Statement Presentation". The standard outlines specific requirements for assessing and disclosing an entity's ability to continue as a going concern. Although the revised standard is not expected to impact the Company's net earnings or financial position, there may be different and additional disclosure surrounding the Company's going concern disclosure.

(e) Section 3064, Goodwill and Intangible assets.

In February 2008, the CICA issued Section 3064, Goodwill and Intangible Assets, which replaces Section 3062, Goodwill and Other Intangible Assets. This new section provides guidance on the recognition, measurement, presentation and disclosure of goodwill and intangible assets. The new Section specifically excludes mining activities related to prospecting, acquisition of mineral rights, exploration, drilling and mineral development from being considered as intangible asset, as existing Section 3061, Property, Plant and Equipment, contains standards for measurement, presentation and disclosure of mining properties. Adoption of this standard did not have any effect on the Company's financial statements.

(f) EIC – 173, Credit risk and the fair value of financial assets and Financial liabilities

In January 2009, the CICA issued EIC-173, Credit risk and the fair value of financial assets and financial liabilities. The EIC provides guidance on how to take into account credit risk of an entity and counterparty when determining the fair value of financial assets and financial liabilities, including derivative instruments. This EIC applies to interim and annual financial statements related to fiscal years beginning on or after January 1, 2009. Adoption of this EIC did not have any effect on the Company's financial statements.

(g) EIC-174, Mining exploration costs

In March 2009, the CICA issued EIC-174, Mining Exploration Cost. The EIC provides guidance on the accounting and the impairment review of exploration costs. The EIC abstract applies to financial statements issued after March 27, 2009. Adoption of this EIC did not have any effect on the Company's financial statements.

5. MINERAL PROPERTY INTERESTS

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral claims. The Company has investigated title to all of its mineral property interests and, to the best of its knowledge, title to all of its interests are in good standing. The mineral property interests in which the Company has committed to earn an interest are located in Canada.

Morrison claims, Canada	2010	2009
Balance, beginning and end of year	\$ 4,832,500	\$ 4,832,500

Morrison claims

On April 19, 2004, the Company and Noranda Mining and Exploration Inc, "Noranda" (which was subsequently acquired by Falconbridge Limited, "Falconbridge", which was subsequently acquired by Xstrata LLP, "Xstrata") signed an agreement whereby Noranda agreed to sell its remaining 50% interest to the Company such that the Company would have a 100% interest in the Morrison claims. In order to obtain the remaining 50% interest, the Company agreed to:

- i) on or before June 19, 2004, pay \$1,000,000 (paid to Noranda), issue 250,000 common shares (issued to Noranda) and issue 250,000 share purchase warrants exercisable at \$4.05 per share until June 5, 2006 (issued to Noranda);
- ii) pay \$1,000,000 on or before October 19, 2005 (paid to Falconbridge);
- iii) pay \$1,500,000 on or before April 19, 2007 (paid to Falconbridge); and
- iv) issue 250,000 common shares on or before commencement of commercial production.

In the event the trading price of the Company's common shares is below \$4.00 per share, the Company is obligated to pay, in cash, the difference between \$1,000,000 and the average trading price which is less than \$4.00 per share multiplied by 250,000 common shares.

The Company agreed to execute a re-transfer of its 100% interest to Falconbridge if the Company fails to comply with the terms of the agreement. This re-transfer is held by a mutually acceptable third party until the final issue of shares has been made.

The Company has also acquired a 100% interest in certain mineral claims adjacent to the Morrison claims, subject to 1.5% NSR royalty.

On January 7, 2005, the Company signed an agreement to acquire an option for a 100% interest in additional claims in the Omineca District of B.C. As consideration, the Company issued 45,000 common shares at a value of \$180,000.

5. MINERAL PROPERTY INTERESTS (cont'd...)

Hearne Hill claims

The Company held a 100% interest in the Hearne Hill claims located in the Omineca District of the Province of British Columbia ("B.C."). During the year ended January 31, 2006, management decided not to continue with the Hearne Hill claims and wrote off the property to operations. The Hearne Hill claims were subject to a legal claim, which was settled in during the year ended January 31, 2009 (Note 16).

Copper claims

The Company holds a 100% interest in certain mineral claims located in the Granisle area of B.C., subject to a 3% NSR royalty. These claims are located near the Morrison claims. The Company has met its requirements to maintain its recorded interest in the mineral claims with the Province of B.C. until 2016 and there are no other payments required until that year. During the year ended January 31, 2005, management decided not to continue with these claims and therefore, the amounts were written-off to operations.

CUB claims

The Company holds a 100% interest in certain mineral claims located in the Granisle area of B.C., subject to a 3% NSR royalty. These claims are located near the Morrison claims. The Company has met its requirements to maintain its recorded interest in the mineral claims with the Province of B.C. until 2016 and there are no other payments required until that year. During the year ended January 31, 2005, management decided not to continue with these claims and therefore, the amounts were written-off to operations.

JANUARY 31, 2010 and 2009

8. SHARE CAPITAL AND CONTRIBUTED SURPLUS (cont'd...)

During the year ended January 31, 2010, 240,000 stock options (2009 - 101,250) with an exercise price of \$3.87 (2009 - \$4.015) were exercised for total proceeds of \$928,800 (2009 - \$406,562).

During the year ended January 31, 2010, NIL warrants (2009 – 1,195,200) with an exercise price of \$NIL (2009 - \$5.00) were exercised for total proceeds of \$NIL (2009 - \$5,976,150).

Stock options

During the fiscal year ended January 31, 2004, the Company adopted a fixed stock option plan whereby the Company can reserve approximately 20% of its outstanding shares for issuance to officers and directors, employees and consultants. Under the plan, the exercise price of each option equals the market price of the Company's stock as calculated on the date of grant. These options can be granted for a maximum term of 5 years, and are subject to a vesting provision whereby 12.5% are exercisable on the date of the grant and 12.5% become exercisable every three months thereafter. All options will be vested after twenty one months.

Stock option transactions are summarized as follows:

	2010		2009		2008	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price

(Expressed in Canadian Dollars)
JANUARY 31, 2010 and 2009

11. INCOME TAXES (cont'd...)

The Company has non-capital losses of approximately \$4,535,000 available for deduction against future taxable income. These losses, if not utilized will expire in years up to 2030 (see table following). Future tax benefits which may arise as a result of these non-capital losses and other tax assets have not been recognized in these financial statements and have been offset by a valuation allowance.

2011	\$ 315,101
2015	438,676
2016	605,469
2027	808,472
2028	942,980
2029	466,936
2030	<u>957,373</u>
Total	<u>\$ 4,535,007</u>

12. COMMITMENT

The Company has entered into an operating lease agreement for office premises. The annual lease commitment under the lease is as follows:

2011	<u>\$ 58,213</u>
Total	<u>\$ 58,213</u>

13. SEGMENTED INFORMATION

All of the Company's operations are within the mining sector. The Company's mining operations are centralized whereby the Company's head office is responsible for the exploration results and to provide support in addressing local and regional issues. As at January 31, 2010 and 2009, the Company's assets are all located in Canada (Notes 5 and 7).

14. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Company's financial instruments include cash and cash equivalents, receivables and deposits, and accounts payable and accrued liabilities and reclamation deposits. The carrying values of these financial instruments approximate their fair values due to their relatively short periods to maturity.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities. The Company has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments.

This note presents information about the Company's exposure to each of the above risks and the Company's objectives, policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout these financial statements. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board has implemented and monitors compliance with risk management policies.

14. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (cont'd...)

(a) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's accounts receivable primarily relates to Goods and Services Tax input tax credits and accrued interest. Accordingly, the Company views credit risk on accounts receivable as minimal.

(b) Liquidity risk

Liquidity risk is the risk that the Company will incur difficulties meeting its financial obligations as they are due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation.

The Company anticipates it will have adequate liquidity to fund its financial liabilities through cash on hand and future equity contributions.

As at January 31, 2010, the Company's financial liabilities were comprised of accounts payable and accrued liabilities which have a maturity of less than one year.

(c) Market risk

Market risk consists of currency risk, commodity price risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

- (i) Currency risk--Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although the Company is considered to be in the exploration stage and has not yet developed commercial mineral interests, the underlying market prices in Canada for minerals are impacted by changes in the exchange rate between the Canadian and United States dollar. As most of the Company's transactions are denominated in Canadian dollars, the Company is not exposed to foreign currency exchange risk at this time.
- (ii) Commodity price risk--Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar, as outlined above. As the Company has not yet developed commercial mineral interests, it is not exposed to commodity price risk at this time.
- (iii) Interest rate risk--Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. As the Company has no debt or interest-earning investments, it is not exposed to interest rate risk at this time.

15. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain a flexible capital structure which will allow it to pursue the development of its mineral properties. Therefore, the Company monitors the level of risk incurred in its mineral property expenditures relative to its capital structure.

The Company considers its capital structure to include working capital and shareholders' equity. The Company monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to facilitate the management of capital and the development of its mineral properties, the Company monitors expenditures on a monthly basis which are reviewed and periodically approved by the Company's Board of Directors.

To maintain or adjust the capital structure, the Company may issue new equity if available on favorable terms, option its mineral properties for cash and/or expenditure commitments from optionees, enter into joint venture arrangements, or dispose of mineral properties.

The Company's investment policy is to hold cash in interest bearing bank accounts and highly liquid short-term interest bearing investments with maturities of one year or less which can be liquidated at any time without penalties.

The Company is not subject to externally imposed capital requirements. There has been no change in the Company's approach to capital management during the year ended January 31, 2010.

16. CONTINGENCY

During the fiscal year ended January 31, 2007, an optionor of the Hearne Hill property (Note 5) which adjoins the Company's Morrison property had filed a Writ of Summons and Statement of Claim against the Company in respect to the option agreement on the Hearne Hill property, which it alleged was of no further force and effect and sought the return of the Hearne Hill property and the area of interest around the Hearne Hill claims. The Writ of Summons and Statement of Claim also included a claim for the return of the Morrison property. During the fiscal year ended January 31, 2009, the Company was advised that the application by the optionors of the Hearne Hill property to include the Company's Morrison property as part of their claim had been dismissed by the Supreme Court of British Columbia. The Company had accrued a total of \$200,000 as payable in regards to Hearne Hill. The accrued liability has been reversed and a recovery was recorded on the statement of operations for the year ended January 31, 2009. During the year ended January 31, 2010, a settlement had been reached with certain optionors of mineral claims in the Hearne Hill area, who had commenced an action against the Company in the BC Supreme Court in April 2006. Pursuant to the settlement, the Company will retain the right, title and interest in and to all claims that were the subject of the action, with the exception of Mineral Tenure No. 242812 (the "Hearne 1 Claim") and Mineral Tenure No. 242813 (the "Hearne 2 Claim"), which were transferred to the plaintiff optionors. Pursuant to the settlement, no cash payment was made to the plaintiffs and all claims in the action have been dismissed.

17. SUBSEQUENT EVENTS

Subsequent to year end, the Company issued 60,000 common shares on exercise of options for total proceeds of \$240,000 and a reclassification of Contributed surplus to capital stock in the amount of \$46,556. The Company has not issued any other stock or announced any private placements or granted any options.

Mineral property interests and deferred exploration costs

Under Canadian GAAP, mineral property interests and deferred exploration costs, including acquisition and exploration costs, are carried at cost and written down if the properties are abandoned, sold or if management determines there to be an impairment in value. Under United States GAAP, deferred exploration costs are expensed as incurred. The Company also considers the provisions of EITF 04-02 "Whether Mineral Rights are Tangible or Intangible Assets" which concluded that mineral rights are tangible assets. Accordingly, the Company capitalizes certain costs related to the acquisition of mineral rights. Once a final feasibility study has been completed, additional costs incurred to bring the mine into production are capitalized as development costs. Costs incurred to access ore bodies identified in the current mining plan after production has commenced are considered production costs and are expensed as incurred. Costs incurred to extend production beyond those areas identified in the mining plan where additional reserves have been established are deferred as development costs until the incremental reserves are produced. Capitalized costs are amortized using the unit-of-production method over the estimated life of the ore body based on proven and probable reserves.

18. DIFFERENCES BETWEEN CANADIAN AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (cont'd...)

Stock-based compensation

Under United States GAAP, effective February 1, 2006, the Company adopted SFAS No. 123 (revised), "Share-Based Payment" ("SFAS 123(R)") utilizing the modified prospective approach. The impact of adoption of the standard did not materially affect the Company's financial position, results of operations, or cash flows because the Company adopted the fair value method of accounting for stock options prescribed by SFAS 123, "Accounting for Stock-Based Compensation" on February 1, 2003. The Company's results for the year ended January 31, 2007 were not significantly affected as a result of adopting SFAS 123(R) on February 1, 2006.

Under Canadian GAAP, the Company accounts for stock-based compensation using the fair value method as disclosed in Note 2. Accordingly, there is no difference between Canadian GAAP and United States GAAP in the accounting for stock-based compensation for the years ended January 31, 2010, 2009 and 2008.

Amortization of property equipment, vehicles and furniture

Under Canadian GAAP, the Company capitalizes the depreciation on fixed assets purchased for exploration work as part of the deferred exploration expenditures. As this is a non-cash item, it is excluded from the cash flow in regards to the Investing activities. Under United States GAAP, deferred exploration costs are expensed as incurred and therefore, the amortization on the property equipment, vehicles and furniture is shown as an operating activity, not an investing activity.

The Fair Value Option for Financial Assets and Financial Liabilities

In February 2007, the FASB issued FAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities – Including an amendment of FASB Statement No. 115", ("FAS 159") which permits entities to choose to measure many financial instruments and certain other items at fair value at specified election dates. A business entity is required to report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date.

This statement is expected to expand the use of fair value measurement. FAS 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years, and is applicable beginning in the first quarter of 2008. The Company is currently evaluating the impact that FAS 159 will have on its financial statements.

Income taxes

Under Canadian GAAP, future tax assets and liabilities recorded at substantively enacted tax rates. Under US GAAP, deferred tax assets and liabilities are recorded at enacted tax rates. There were no significant differences between enacted and substantively enacted tax rates for the information presented.

In June 2006, FASB issued Financial Interpretation NO. 48 (ASC 740), Accounting for Uncertainty in Income Taxes – An Interpretation of SFAS Statement No. 109. This interpretation provides guidance on recognition and measurement of uncertainties in income taxes and is effective for the Corporation's 2007 fiscal year end. The adoption of this Interpretation did not have a significant effect on the Corporation's results of operations or financial position.

19. NEW ACCOUNTING PRONOUNCEMENTS

Canadian pronouncements

(i) Business Combinations, Consolidated Financial Statements, Non-controlling Interests

In January 2009, the CICA issued Handbook Sections 1582, Business Combinations, ("Section 1582"), 1601, Consolidated Financial Statements, ("Section 1601") and 1602, Non-controlling Interests, ("Section 1602") which replaces CICA Handbook Sections 1581, Business Combinations, and 1600, Consolidated Financial Statements. Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combination accounting standard under International Financial Reporting Standards ("IFRS"). Section 1582 is applicable for the Company's business combinations with acquisition dates on or after January 1, 2011. Early adoption of this Section is permitted. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. Section 1601 is applicable for the Company's interim and annual consolidated financial statements for its fiscal year beginning January 1, 2011. Early adoption of this Section is permitted. The Company has not chosen to early adopt any one of these Sections at the year end date.

(ii) International Financial Reporting Standards (IFRS)

In 2006, the Canadian Accounting Standards Board (AcSB) published a new strategic plan that will significantly affect financial reporting requirements for Canadian compliances. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008, the AcSB announced that 2011 is the changeover date for publicly accountable companies to use IFRS, replacing Canadian GAAP. This date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended October 31, 2011. In July 2008, the Canadian Securities Administrators announced that early adoption will be allowed in 2009 subject to seeking exemptive relief. The Company is currently assessing the financial reporting impact of the transition to IFRS and the changeover date.

United States pronouncements

(i) In June 2008, the FASB ratified FSP No. EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities" (FSP No. EITF 03-6-1), which addresses whether instruments granted in share-based payment awards are participating securities prior to vesting and, therefore, must be included in the earnings allocation in calculating earnings per share under the two-class method described in SFAS No. 128, "Earnings per Share" (SFAS No. 128). FSP No. EITF 03-6-1 requires that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend-equivalents be treated as participating securities in calculating earnings per share. FSP No. EITF 03-6-1 is effective for fiscal years beginning after December 15, 2008, and shall be applied retrospectively to all prior periods. We are currently evaluating the effects, if any that FSP No. EITF 03-6-1 may have on earnings per share.

19. NEW ACCOUNTING PRONOUNCEMENTS (cont'd...)

United States pronouncements (cont'd...)

(ii) Business Combinations

In December 2007, the FASB issued ASC 805, Business Combinations (ASC 805). ASC 805 significantly changes the accounting for business combinations in a number of areas including the treatment of contingent consideration, pre-acquisition contingencies, transaction costs, in-process research and development, and restructuring costs. In addition, under ASC 805, changes in an acquired entity's deferred tax assets and uncertain tax positions after the measurement period will impact income tax expense. ASC 805 is effective for fiscal periods beginning after December 15, 2008. We adopted ASC 805 on February 1, 2009. This standard will change our accounting treatment for business combinations on a prospective basis.

In December 2007, the statement "No controlling Interests in Consolidated Financial Statements, which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the no controlling interest, changes in a parent's ownership interest and the valuation of retained non-controlling equity investments when a subsidiary is deconsolidated. The Statement also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the non-controlling owners. The statement is effective for fiscal periods beginning after December 15, 2008. We adopted the statement on February 1, 2009. Adoption of this standard did not have a material impact on the Company's financial position, results of operations or cash flows.

(iii) FASB ASC 815

In March 2008, the FASB issued ASC 815, *Disclosures about Derivative Instruments and Hedging Activities* (ASC 815). ASC 815 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. This statement is effective for financial statements issued for fiscal periods beginning after November 15, 2008. Accordingly, the Company adopted ASC 815 on February 1, 2009. Adoption of this standard did not have a material impact on the Company's financial position, results of operations or cash flows.

(iv) SFAS 162

In May 2008, the FASB issued the statement "The Hierarchy of Generally Accepted Accounting Principles" (SFAS 162). This statement identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in accordance with GAAP. With the issuance of this statement, the FASB concluded that the GAAP hierarchy should be directed toward the entity and not its auditor, and reside in the accounting literature established by the FASB as opposed to the American Institute of Certified Public Accountants (AICPA) Statement on Auditing Standards.

19. NEW ACCOUNTING PRONOUNCEMENTS (cont'd...)

United States pronouncements (cont'd...)

(v) SFAS 163

In May 2008, the FASB issued the statement "Accounting for Financial Guarantee Insurance Contracts. The statement requires that an insurance enterprise recognize a claim liability prior to an event of default (insured event) when there is evidence that credit deterioration has occurred in an insured financial obligation. This Statement also clarifies how Statement 60 applies to financial guarantee insurance contracts, including the recognition and measurement to be used to account for premium revenue and claim liabilities. Those clarifications will increase comparability in financial reporting of financial guarantee insurance contracts by insurance enterprises. This Statement requires expanded disclosures about financial guarantee insurance contracts. The accounting and disclosure requirements of the Statement will improve the quality of information provided to users of financial statements. The statement is effective for financial statements issued for fiscal years beginning after December 15, 2008. We adopted the statement on February 1, 2009. Adoption of the statement did not have a material impact on its financial condition or results of operation.

(vi) FASB ASC 850

In May 2009, the FASB issued ASC 855, "Subsequent Events," which establishes general standards for accounting for and disclosure of events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. The pronouncement requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date, whether that date represents the date the financial statements were issued or were available to be issued. ASC 855 is effective with interim and annual financial periods ending after June 15, 2009. We adopted ASC 855 on February 1, 2009. Management has evaluated the impact of the adoption of and it has had no impact the Company's results of operations, financial position or cash flows.

(vii) SFAS 166

In June 2009, the FASB issued the statement "Accounting for Transfers of Financial Assets—an amendment of FASB Statement" ("SFAS 166"). SFAS No. 166 is intended to establish standards of financial reporting for the transfer of assets and transferred assets to improve the relevance, representational faithfulness, and comparability. SFAS 166 was established to clarify de-recognition of assets under FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. SFAS No. 166 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2009. We will adopt the statement on February 1, 2010. Adoption of this statement is not expected to impact on our consolidated financial statements.

(viii) SFAS 167

In June 2009, the FASB issued the statement "Amendments to FASB Interpretation No. 46(R)" ("SFAS No. 167"). SFAS No. 167 eliminates the exception to consolidate a qualifying special-purpose entity, changes the approach to determining the primary beneficiary of a variable interest entity and requires companies to more frequently re-assess whether they must consolidate variable interest entities. Under the new guidance, the primary beneficiary of a variable interest entity is identified qualitatively as the enterprise that has both (a) the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance, and (b) the obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. SFAS No. 167 becomes effective for the Company's fiscal 2011 year-end and interim reporting periods thereafter. The Company does not expect SFAS No. 167 to have a material impact on its financial statements.

19. NEW ACCOUNTING PRONOUNCEMENTS (cont'd...)

United States pronouncements (cont'd...)

(ix) ASC 105-20-05

In July 2009, the FASB issued ASC 105-20-05, "FASB Accounting Standards Codification" ("ASC 105-20-05"), as the single source of authoritative nongovernmental U.S. generally accepted accounting principles (GAAP). The Codification is effective for interim and annual periods ending after September 15, 2009. All existing accounting standards are superseded as described in ASC 105-20-05. All other accounting literature not included in the Codification is non-authoritative. Management is currently evaluating the impact of the adoption of ASC 105-20-05 but does not expect the adoption of ASC 105-20-05 to impact the Company's results of operations, financial position or cash flows.

(x) APB 141

In May 2008, the FASB issued FSP No. APB 14-1, "Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)" ("FSP 14-1"). FSP 14-1 applies to convertible debt instruments that, by their stated terms, may be settled in cash (or other assets) upon conversion, including partial cash settlement, unless the embedded conversion option is required to be separately accounted for as a derivative under FASB Statement No. 133. Convertible debt instruments within the scope of FSP 14-1 are not addressed by the existing APB 14. FSP 14-1 would require that the liability and equity components of convertible debt instruments within the scope of FSP 14-1 be separately accounted for in a manner that reflects the entity's nonconvertible debt borrowing rate. This will require an allocation of the convertible debt proceeds between the liability component and the embedded conversion option (i.e., the equity component). The difference between the principal amount of the debt and the amount of the proceeds allocated to the liability component would be reported as a debt discount and subsequently amortized to earnings over the instrument's expected life using the effective interest method. FSP APB 14-1 is effective for the Company's fiscal year beginning February 1, 2009 and will be applied retrospectively to all periods presented. Adoption of this standard did not have a material impact on the Company's financial position, results of operations or cash flows.

(xi) ASC 605

In September 2009, FASB amended the ASC as summarized in ASU 2009-13, "Revenue Recognition (ASC 605): Multiple-Deliverable Revenue Arrangements." Guidance in ASC 605-25 on revenue arrangements with multiple deliverables has been amended to require an entity to allocate revenue to deliverables in an arrangement using its best estimate of selling prices if the vendor does not have vendor-specific objective evidence or third-party evidence of selling prices, and to eliminate the use of the residual method and require the entity to allocate revenue using the relative selling price method. The new guidance also requires expanded quantitative and qualitative disclosures about revenue from arrangements with multiple deliverables. The update is effective for fiscal years beginning on or after June 15, 2010, with early adoption permitted. Adoption may either be on a prospective basis for new revenue arrangements entered into after adoption of the update, or by retrospective application. The Company is assessing the potential impact of the update on its financial statements.

19. NEW ACCOUNTING PRONOUNCEMENTS (cont'd...)

United States pronouncements (cont'd...)

(xii) ASC 820

In January 2010, the FASB issued ASU 2010-06, "Fair Value Measurements and Disclosures (ASC 820): Improving Disclosures about Fair Value Measurements." This update will require (1) an entity to disclose separately the amounts of significant transfers in and out of Levels 1 and 2 fair value measurements and to describe the reasons for the transfers; and (2) information about purchases, sales, issuances and settlements to be presented separately (i.e. present the activity on a gross basis rather than net) in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This guidance clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value and requires disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. The new disclosures and clarifications of existing disclosure are effective for fiscal years beginning after December 15, 2009, except for the disclosure requirements for related to the purchases, sales, issuances and settlements in the roll-forward activity of Level 3 fair value measurements. Those disclosure requirements are effective for fiscal years ending after December 31, 2010. The Company is still assessing the impact on this guidance and does not believe the adoption of this guidance will have a material impact to its financial statements.

Management does not believe that other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants or the SEC have a material impact on the Company's present or future financial statements.
